

Operating Instructions for Detox EQ

The Detox EQ is an active, three band EQ built around the Burr Brown IC. Each band offers approximately 5db of boost or cut. With overlapping frequencies, there are no "holes" in the EQ and each frequency is musical and useful. The Detox EQ works well with almost any stringed instrument.

Input-Instrument in. Unplug when not in use to conserve battery life.

Out-Output to amplifier.

Treble: Adjusts the amount of treble boost or cut.

Bass: Adjusts the amount of bass boost or cut.

Mid: Adjusts the amount of mid boost or cut.

Level: Controls overall output level of the Detox EQ

-9VDC Jack-For use with -(Negative) center, 9VDC,
filtered and regulated, UL or CE listed power supply.
